2335 SS RIB 103 Day
Attractive High Yielding Hybrid with Versatility

- Expect Top End Yields in Northern Indiana, Northern Ohio and Michigan
- Very Good Stalks and Roots with Solid Standability
- Handles All Soil Types with Very Good Stress Tolerance with the Ability to Punch out Top End Yield
- Excellent Emergence and Early Vigor Enhances Reduced Tillage or No-till Performance
- Semi-Flex Ear Style with Blocky Deep Kernels and Very Good Test Weight

2440 SS RIB 106 Day
"Acre Taker" of the Mid Season Hybrids

- Excellent Stress and Drought Tolerance with the Ability to Yield on Your Best Acres
- Excellent Choice for Continuous Corn with a Very Good Overall Disease Package
- Strong Emergence and Early Vigor to Handle Early Planting and Cold Soils
- Very Attractive Hybrid with Girthy Ears that Look Unique
- 2440 SS RIB is an Excellent Replacement for 2433 SS RIB

2210 SS RIB 100 Day
Exciting High Yielding Hybrid with Incredible Versatility

- Expect Top Yields Across All Soils and Environments Including Muck
- Good Ear Flex Allowing for Variable Populations
- Very Good Staygreen and Intactness with an Above Average Greensnap Rating
- Higher Yielding Replacement for 2212 SS RIB

2250 SS RIB 101 Day
New Level of Yield in the 100 Day Maturity Market

- All Around Solid Agronomics with New Yield Expectations in This Maturity
- Attractive Hybrid with Long Girthy Ears and Very Good Test Weight Grain
- Very Good Preliminary Tar Spot Tolerance
- Goes Across all Soils at Moderate Populations
- Package with 2210 SS RIB and 2335 SS RIB for Great in Field Diversity

2305 Duracade 5222 EZ Refuge 103 Day
DuracadeViptera™ Rootworm Product with Yield

- Versatile Movement from North to South and East to West
- Outstanding Grain Quality and Test Weight
- Fantastic Plant Health and Intactness
- Solid Early Silage Hybrid
- Carries 2 Unique Rootworm Events to Mitigate Risk
- Incredible Below Ground and Above Ground Insect Control

2632 SS RIB

110 Day

Contest Winning Yields Acre after Acre

- Tremendous Yield Potential with Response to Higher Management, Irrigation and Fungicide
- Medium Statured Hybrid with Good Stalk and Root Strength
- Very Consistent Girthy Ears Down the Row / Performs Best at Medium to High Populations
- Overall Solid Disease Package with Good Corn on Corn Adaptability
- Expect Top-End Yield Punch Similar to 2667 DGV2P RIB but Drier

2633 SS RIB

110 Day

Agronomically Sound "Acre Taker"

- Attractive Hybrid with Consistency Across All Soils and Environments
- Excellent Roots and Early Vigor / Very Good Stalks with a Low Green Snap Risk
- Consistent Semi-Flex Ear with Very Good Test Weight and Grain Quality
- Truly a "Go Anywhere, Can't Miss" Hybrid at 110 Day Maturity

2649 D

111 Day

Genetically Unique with Yield and Grain Quality

- Appealing Plant Type with Great Late-Season Intactness
- Striking Disease Tolerance with Performance Against GLS, NCLB and Good Toughness to Tar Spot
- Superb Grain Quality and Test Weight
- Great Package Hybrid from a Diversity Standpoint with 2632 SS RIB and 2669 SS RIB

2669 SS RIB

112 Day

Outstanding Full Season Hybrid with Lead Product Potential

- Attractive Hybrid with Very High Top-End Yield Punch
- Semi-Flex Ear Style with Excellent Test Weight and Grain Quality
- Handles All Soil Types and Will Reward You if Managed for High Yields
- Quick Out of the Ground with Very Good Standability All Season

2144 VIPTERA 3220A EZ Refuge 92 Day

Widely Adapted Early Hybrid with Superior Yield Performance

- Strong Yield Potential Across All Soil Types and Management Practices
- Medium-Tall Plant with Excellent Standability
- Very Good Test Weight Grain on a Girthy Semi-Flex Ear Style
- Handles Stress and Varying Plant Populations Well / Is an Artesian® Hybrid
- Outstanding Emergence and Seedling Vigor
- Above Average Tolerance to NCLB and Goss's Wilt

2160 PCE 97 Day

Versatility and Agronomics... The Complete Package

- Exceptional Top End Yield Performance with Strong Agronomics
- Widely adapted Across all Soils with Very Good Stress Tolerance
- Attractive Fall Appearance with Great Late Season Stalks
- Solid Overall Disease Package with Very Good Tolerance to Goss's Wilt and NCLB / Also Exhibiting Good Tar Spot Tolerance
- Outstanding Early Season Silage Choice

2299 TRECEPTA RIB **NEW** 102 Day

Contest Winning Yield Potential with Excellent Stress Tolerance in a Trecepta® Trait Package

- Very High Yield Potential with Wide Adaptability Across Soils
- Strong Disease Package with Very Good Goss's Wilt and Tar Spot Tolerance / Impressive Staygreen and Harvest Appearance
- Solid Roots and Stalks with Good Ear Flex and Drydown Liking Medium to Medium High Populations
- Outstanding Replacement for 2250 VT2P RIB with Improved Yield, Standability, and Better Stress Tolerance

2335 VT2P RIB 103 Day

Attractive High Yielding Hybrid with Versatility

- Expect Top End Yields in Northern Indiana, Northern Ohio and Michigan
- Very Good Stalks and Roots with Solid Standability
- Handles All Soil Types with Very Good Stress Tolerance with the Ability to Punch out Top End Yield
- Excellent Emergence and Early Vigor Enhances Reduced Tillage or No-till Performance
- Semi-Flex Ear Style with Blocky Deep Kernels and Very Good Test Weight

2170 TRECEPTA RIB 98 Day

"Acre Taker" of the Early Season Hybrids

- Ultra High Yielding and Widely Adapted / Late Flower but Moves North Well
- Taller Statured Hybrid with Excellent Roots and Very Good Stalk Strength
- Above Average Disease Tolerance with Very Good Preliminary Tar Spot and Goss's Wilt Tolerance
- Girthy Semi-Flex Ear Style with Blocky Deep Kernels and Fast Drydown / Solid Choice for an Early Silage Hybrid
- Excellent Choice for Your Average to Better Soils and High Management Fields
- Plant Along Side 2177 AA and 2299 Trecepta RIB for Excellent in Field Diversity

2177 AA **NEW** 98 Day

New Agrisure® Above Artesian® Hybrid with Yield and Stress Tolerance

- Widely Adapted Fast Drying Hybrid with Very High Yield Potential and Above Average Test Weight Grain
- Strong Foliar Disease Package with Above Average Tar Spot and NCLB Tolerance
- Girthy Semi-Flex Ear Style Adapted to all Populations / Great Choice for Silage
- Excellent Performance Across the Varying Soils of Michigan, Indiana and Ohio

2250 VT2P RIB 101 Day

New Level of Yield in the 100 Day Maturity Market

- All Around Solid Agronomics with New Yield Expectations in This Maturity
- Attractive Hybrid with Long Girthy Ears and Very Good Test Weight Grain
- Very Good Preliminary Tar Spot Tolerance
- Goes Across all Soils at Moderate Populations
- Package with 2299 Trecepta RIB and 2335 VT2P RIB for Great in Field Diversity

2386 PCE **NEW** 104 Day New Leader for Yield and Consistency at 104 Day

- Excellent Yield Punch Across most Soil Types in the Great Lakes Region
- Exceptional Disease Package with High Tolerance to Tar Spot, GLS, and Goss's Wilt
- Very Consistent Girthy Ears that Exhibit High Test Weight Grain
- Attractive Look with Outstanding Late Season Health, Standability and Intactness

2483 VT2P RIB 105 Day Exciting 105 Day Hybrid with Yield and Stress Tolerance

- Semi-Flex Ear Style with Very Good Drought Stress Tolerance
- Fantastic Disease Tolerance to Stalk Anthracnose, Goss's Wilt, and Tar Spot / Very Good Choice for Continuous Corn Acres
- Fast out of the Ground with Good Early Vigor
- Very Good Stalks and Roots with Low Greensnap Risk
- Strong Mid-Season Silage Choice

2515 VT2P RIB 107 Day

The Mid-Season "Do-It-All" Hybrid

- Excellent Top-End Yield Potential and Handles Stress Prone Soils Well
- Strong Drought Tolerance with Above Average Plant Health, Staygreen, and Harvest Appearance
- Very Good Ear Flex and Drydown
- Strong Stalks with Average Root Strength / Likes Low to Medium Populations for Best Performance
- 2515 VT2P RIB is an Outstanding Choice for ANY Acre

2575 PCE NEW 108 Day

Outstanding New PowerCore® Enlist® Hybrid with Lead Product Potential

- Excellent Yield Potential Across Soils and Environments
- Extremely Healthy Hybrid with Excellent Tolerance to NCLB, GLS, and Tar Spot
- Great Roots and Stalks Aid in Late Season Standability
- Semi-Flex Ear Style with Deep Kernels and Above Average Test Weight
- Position Across all Acres and Enjoy Top Yields

2432 TRECEPTA RIB NEW 106 Day

Superb Top End Yield Potential with Excellent Stress Tolerance

- Top End Yield Punch in a Trecepta® Hybrid with the Ability to Yield Across Soils and Handle Stressful Sands and Clays
- Fast Out of the Ground Exhibiting Strong Emergence and Seedling Vigor
- Excellent Disease Package with Very Good Stalks and Roots / Good Tar Spot Tolerance
- Good Ear Flex and Kernel Depth / will Yield under Varied Populations and Management Practices
- A Fast Drying 105 - 106 Day Hybrid Makes 2432 TRECEPTA RIB a Must Plant for 2024

2440 VT2P RIB 106 Day

"Acre Taker" of the Mid Season Hybrids

- Excellent Stress and Drought Tolerance with the Ability to Yield on Your Best Acres
- Excellent Choice for Continuous Corn with a Very Good Overall Disease Package
- Strong Emergence and Early Vigor to Handle Early Planting and Cold Soils
- Very Attractive Hybrid with Girthy Ears that Look Unique
- 2440 VT2P RIB is an Excellent Replacement for 2433 VT2P RIB

2497 PCE NEW 107 Day

New 107 Day PowerCore® Enlist® Hybrid with Tremendous Health

- Exceptional Yield Performance Across All Soils with Solid Agronomics
- Outstanding Plant Health with Very Good Tolerance to Tar Spot, GLS and NCLB
- Roots and Stalks are First Rate with Attractive Fall Appearance and Intactness
- Girthy Ear Style exhibiting Deep Kernels with the Ability to Handle Varied Populations
- Plant with 2515 VT2P RIB and 2584 VT2P RIB for Incredible in Field Genetic Diversity

2584 VT2P RIB

108 Day

Elite Genetics with Tremendous Top End Yield Potential

- Widely Adapted Hybrid with Strong Stalks and Roots
- Overall Solid Disease Package with Very Good Ratings for GLS and NCLB
- Incredible Ear Consistency from Moderate to High Populations / Will Reward Those that Manage for Top End Yield and NCGA Entries
- Very Good Test Weight Grain / Ears Exhibit Blocky Deep Kernels
- Plant 2584 VT2P RIB with 2583 TRECEPTA RIB and 2575 PCE to Experience a New Level of Performance at the 108-109 Day RM Band

2566 AA

NEW 109 Day

Diverse Genetics Plus Yield and Toughness

- Great Stress Tolerance with Above Average Emergence and Seedling Vigor
- Big Long Flex Ear exhibiting Redish Deep Kernels
- Outstanding Stalks and Roots to Stand Late into Fall
- Great Staygreen and Health with Super Tolerance to NCLB
- Can be Used as a Dual Purpose or Silage Choice

2656 PCE **NEW** 111 Day

Outstanding New 111 Day PowerCore® Enlist® Hybrid with Yield and Agronomics

- Very Showy Hybrid that Will Yield Across Soils and Environments
- Girthy Eared Hybrid with Excellent Ear Flex and Test Weight / Excels at Medium Populations in Medium to High Yield Environments
- Medium Statured Hybrid with Strong Stalks and Excellent Late Season Staygreen
- Good Overall Disease Package with Very Good Tolerance to Tar Spot
- 2656 PCE Exhibits Excellent Emergence and Early Vigor / Plant with 2678 VT2P RIB, 2667 DG VT2P RIB, and 2679 DG VT2P RIB for Excellent in Field Diversity

2649 AA 111 Day

Genetically Unique with Yield and Grain Quality

- Appealing Plant Type with Great Late-Season Intactness
- Striking Disease Tolerance with Performance Against GLS, NCLB and Good Toughness to Tar Spot
- Superb Grain Quality and Test Weight
- Great Package Hybrid from a Diversity Standpoint with 2667 DG VT2P RIB, 2678 VT2P RIB, and 2669 VT2P RIB

2583 TRECEPTA RIB 109 Day

Must Plant 109 day Trecepta® Hybrid that Leads in Yield from Stress to Best

- Very Long, 18-20 Kernel Row Ears with Excellent Tip Fill and Good Grain Weight
- Landlord Corn, Showy All Season Long with Tremendous Staygreen and Standability
- Easy to Place with Excellent Soil Versatility
- A Must Plant for 2024

2633 VT2P RIB 110 Day

Agronomically Sound "Acre Taker"

- Attractive Hybrid with Consistency Across All Soils and Environments
- Excellent Roots and Early Vigor / Very Good Stalks with a Low Green Snap Risk
- Consistent Semi-Flex Ear with Very Good Test Weight and Grain Quality
- Truly a "Go Anywhere, Can't Miss" Hybrid at 110 Day Maturity

2632 VT2P RIB 110 Day

Contest Winning Yields Acre after Acre

- Tremendous Yield Potential with Response to Higher Management, Irrigation and Fungicide
- Medium Statured Hybrid with Good Stalk and Root Strength
- Very Consistent Girthy Ears Down the Row / Performs Best at Medium to High Populations
- Overall Solid Disease Package with Good Corn on Corn Adaptability
- Expect Top-End Yield Punch Similar to 2667 DGV2P RIB but Drier

2667 DG VT2P RIB

111 Day

Gorgeous Yield Leader at 111 Days with Diverse Genetics and DroughtGard® Protection

- Tremendous Yield Punch with the Ability to go Across Soil Types and Management Practices
- Strong Disease Package with Very Good Goss's Wilt and Northern Corn Leaf Blight Tolerance
- Medium-Tall Hybrid that Stands Well and has a Very Good Green Snap Rating
- Will Respond to High Management and Flowers Early for Maturity
- If You've Liked 2665 DG VT2P RIB, You'll Love 2667 DG VT2P RIB

2678 VT2P RIB

111 Day

Tremendous Yield Potential with Consistency Across Many Acres

- Top End Yield Performance with Ability to Take Heat and Drought / Moves South Well
- Girthy Ear Type with High Test Weight Grain
- Reliable Standability with Delightful Harvest Appearance
- Improved Performance in Every Category over our Popular 2668 VT2P RIB
- Handles Wet Feet Well / Great for Those Wet Sticky Clays

2733 VT2P RIB

115 Day

NEW Full Season Yield Leader with Wide Adaptability

- Alluring Plant Type with the Ability to Yield Across all Soil Types and Environments
- Sturdy Disease Package that is Good on NCLB, GLS, Goss's Wilt and Southern Rust
- Girthy and Consistent Semi-Flex Ears Exhibiting Thick Deep Kernels
- Full Season Hybrid that Has Good Northern Movement and Will Respond to High Management
- 2733 VT2P RIB and 2711 VT2P RIB Make a Great Full Season 1-2 Punch

2669 VT2P RIB

112 Day

Outstanding Full Season Hybrid with Lead Product Potential

- Attractive Hybrid with Very High Top-End Yield Punch
- Semi-Flex Ear Style with Excellent Test Weight and Grain Quality
- Handles All Soil Types including Sand and Will Reward You if Managed for High Yields
- Quick Out of the Ground with Very Good Standability All Season

2679 DG VT2P RIB

113 Day

Impressive Yield Potential in a DroughtGard® Hybrid

- Voted "Most Likely to Consistently Win Yield Trials"
- Solid Agronomics with Very Good Stalks, Roots, and Test Weight
- Best Placement in Well Drained Soils on Rotated Acres with High Management
- NCGA Winning Yield Potential

2711 VT2P RIB

114 Day

UNBELIEVABLE Step Change in Yield for the Full Season Market

- Tall High Yielding Hybrid with Very Good Test Weight and Grain Quality / Kernels are BIG and DEEP
- Semi-Flex Ear Style Allows for Wide Adaptability and Varying Plant Populations
- Very Good Stalk Strength with Good Roots
- Overall Good Disease Package with a Very Good Stalk Anthracnose Rating and Plant Intactness / Will Respond to Fungicide
- Good Drought Tolerance with Best Performance on Rotated Acres

Versatility and Agronomics... The Complete Package

- Exceptional Top End Yield Performance with Strong Agronomics
- Widely adapted Across all Soils with Very Good Stress Tolerance
- Attractive Fall Appearance with Great Late Season Stalks
- Solid Overall Disease Package with Very Good Tolerance to Goss's Wilt and NCLB / Also Exhibiting Good Tar Spot Tolerance
- Outstanding Early Season Silage Choice

2250 101 Day

New Level of Yield in the 100 Day Maturity Market

- All Around Solid Agronomics with New Yield Expectations in This Maturity
- Attractive Hybrid with Long Girthy Ears and Very Good Test Weight Grain
- Very Good Preliminary Tar Spot Tolerance
- Goes Across all Soils at Moderate Populations
- 2250 is a Must Plant Early Season Conventional Hybrid

2386 104 Day

New Leader for Yield and Consistency at 104 Day

- Excellent Yield Punch Across most Soil Types in the Great Lakes Region
- Exceptional Disease Package with High Tolerance to Tar Spot, GLS, and Goss's Wilt
- Very Consistent Girthy Ears that Exhibit High Test Weight Grain
- Attractive Look with Outstanding Late Season Health, Standability and Intactness

2440 **NEW** 106 Day

"Acre Taker" of the Mid Season Hybrids

- Excellent Stress and Drought Tolerance with the Ability to Yield on Your Best Acres
- Excellent Choice for Continuous Corn with a Very Good Overall Disease Package
- Strong Emergence and Early Vigor to Handle Early Planting and Cold Soils
- Very Attractive Hybrid with Girthy Ears that Look Unique
- 2440 is an Excellent Replacement for 2550

2497 **NEW** 107 Day

New 107 Conventional Hybrid with Tremendous Health

- Exceptional Yield Performance Across All Soils with Solid Agronomics
- Outstanding Plant Health with Very Good Tolerance to Tar Spot, GLS and NCLB
- Roots and Stalks are First Rate with Attractive Fall Appearance and Intactness
- Girthy Ear Style with Deep Kernels with the Ability to Handle Varied Populations
- Package with 2386, 2575 and 2598 and Watch the Bushels Stack up in the Grain Tank

2575 **NEW** 108 Day

Outstanding New Conventional Hybrid with Lead Product Potential

- Excellent Yield Potential Across Soils and Environments
- Extremely Healthy Hybrid with Excellent Tolerance to NCLB, GLS and Tar Spot
- Great Roots and Stalks Aid in Late Season Standability
- Semi-Flex Ear Style with Deep Kernels and Above Average Test Weight
- Position Across all Acres and Enjoy Top Yields

2633

Agronomically Sound "Acre Taker"

- Attractive Hybrid with Consistency Across All Soils and Environments
- Excellent Roots and Early Vigor / Very Good Stalks with a Low Green Snap Risk
- Consistent Semi-Flex Ear with Very Good Test Weight and Grain Quality
- Truly a "Go Anywhere, Can't Miss" Hybrid at 110 Day Maturity

110 Day

2690

Dual Purpose Hybrid Designed for the Moderate Acre

- Excellent Grain Quality and Ear Flex / Plant at Moderate Populations
- Excellent Tonnage Potential from a Medium-Tall to Tall Hybrid but Also Offers a Solid Grain Choice
- Outstanding Goss's Wilt Tolerance

110 Day

2656

Outstanding Conventional Hybrid with Yield and Agronomics

- Very Showy Hybrid that Will Yield Across Soils and Environments
- Girthy Eared Hybrid with Excellent Ear Flex and Test Weight
- Medium Statured Hybrid with Strong Stalks and Excellent Late Season Staygreen
- Good Overall Disease Package with Very Good Tolerance to Tar Spot
- 2656 Exhibits Excellent Emergence and Early Vigor / Plant with 2669 and 2711 for Excellent in Field Diversity

NEW

111 Day

2660

Agronomically Sound Conventional Choice

- Prefers Moderate Yield Environments with Medium Populations
- Good Stalks and Roots with Good Green Snap Tolerance
- Another Product Offering Excellent Goss's Wilt Tolerance

112 Day

2698

Widely Adapted Hybrid with Impressive Yield Potential

- Large Flex Ears and Excellent Kernel Depth with the Ability to Yield at Low to Medium Populations
- Medium-Tall Plant with Very Good Roots and Stalks that is Versatile Across Soils and Environments
- Disease Package is Solid Across all Major Diseases Including Southern Rust
- A Great Choice for Silage

114 Day

2711

UNBELIEVABLE Step Change in Yield for the Full Season Market

- Tall High Yielding Hybrid with Very Good Test Weight and Grain Quality / Kernels are BIG and DEEP
- Semi-Flex Ear Style Allows for Wide Adaptability and Varying Plant Populations
- Very Good Stalk Strength with Good Roots
- Overall Good Disease Package with a Very Good Stalk Anthracnose Rating and Plant Intactness / Will Respond to Fungicide
- Very Good Drought Tolerance with Best Performance on Rotated Acres

NEW

114 Day

Wyckoff Hybrids now offers Agricultural Chemicals and Micronutrients

Wyckoff Hybrids and its sales representatives recommend products from ALL manufacturers of crop input suppliers. We can supply herbicides, insecticides, fungicides, farmer applied seed treatments, inoculants, adjuvants, surfactants, nitrogen stabilizers, bio-stimulants, tank cleaners, low salt starter products, soil amendment products, micronutrients, and fertilizers. We can offer most of these products in either bulk or small packaging.

Please visit with your representative for pricing and how we can supply these products for you.

**Please see your representative for Wyckoff Hybrids Chemical/Micronutrient Policies.*

ENLIST® WEED CONTROL SYSTEM— PROVEN CONTROL OF TOUGH WEEDS

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use on Enlist® crops.

SOYBEANS 2,4-D choline | Glyphosate | Glufosinate

CORN 2,4-D choline | Glyphosate | Glufosinate | FOP Herbicides

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

Improve Your Stand and Enrich Your Yields with **WycKOAT** Soybean Seed Treatment

Fueled by **SOY-DEFENSE**

WycKOAT

Fueled by **SOY-DEFENSE**

proprietary seed treatment has been designed for the best protection against the most damaging Indiana and Southern Michigan diseases and pest pressures. Made for improved plant-ability with polymers and dry additives. It's the only complete seed treatment on the market that offers high octane inoculant standard with over a 200-day planting window after application.

Active Ingredients:

- 3 Fungicides
- 1 Insecticide
- 1 Nematode Defense, SAR (Systemic Acquired Resistance) Activator, Bio-stimulant
- 1 Inoculant

Insects Controlled:

- Aphids
- Seed Corn Maggots
- White Grubs
- Leafhoppers
- Bean Leaf Beetles
- Thrips
- Wireworms

Diseases Controlled:

- Pythium Seed Rot, Damping Off, Seedling Blight
- Rhizoctonia Seed Rot, Damping Off, Seedling Blight
- Seed Decay Fungi
- Fusarium Seed Rot, Damping Off, Seedling Blight
- Phytophthora
- Diaporthe – Phomopsis on the seed coat
- SDS (Suppression)
- Seed-Borne White Mold

Nematodes Defended:

- Soybean Cyst Nematode
- Reniform Nematode
- Root-knot Nematode

Strengths of our new **SOY-DEFENSE** product

The active ingredient in **SOY-DEFENSE** was discovered and patented by Cornell University. It acts by triggering Systemic Acquired Resistance by turning on the plant's own defense system. Plants respond to **SOY-DEFENSE** by protecting itself from nematodes, magnifying vigor, proliferating root volume, increasing plant mass, and boosting higher yields.

SOY-DEFENSE works by suppressing SCN (soybean cyst nematode) egg production. Studies conducted by Dr. John Eisenback, Virginia Tech University, proved a 47% drop in cysts per plant, 47% drop in Eggs per plant, and a 67% drop in males per plant with **SOY-DEFENSE** compared to the untreated check. Less Eggs = Less Nematodes = Higher Yields

According to Jason Bond, plant pathologist at Southern Illinois University, fields with soybean cyst nematode pressure have been shown to be more susceptible to the pathogen that causes SDS (Sudden Death Syndrome). Shawn Conley, professor at the University of Wisconsin-Madison, goes even further suggesting that a seed treatment that reduces the number of SCN eggs can provide a yield benefit. Hence, our **SOY-DEFENSE** product, with its SCN egg reducing properties, along with SDS genetic resistance in Wyckoff Hybrids branded soybean products, will offer good Sudden Death Syndrome tolerance.

Extra Protection Against SDS and Nematodes

Is bringing the added benefits of Saltro® fungicide seed treatment, the latest technology from Syngenta that contains Adepidyn®, a potent SDHI fungicide. Saltro provides consistent yield improvement over IlevO® seed treatment under high Sudden Death Syndrome pressure without adding unnecessary plant stress and phytotoxicity. It offers greater root protection because it stays in the root zone and gives your soybeans more robust activity against soybean cyst, root knot, reniform, lesion and lance nematodes. Saltro inhibits succinate dehydrogenase that susceptible organisms use for survival and growth. Soybean Cyst Nematode and *Fusarium virguliforme* (the fungus that causes SDS) both use succinate dehydrogenase for life processes.

Cost

are being offered at very competitive pricing. See your Wyckoff Hybrids representative for details.

SOYBEANS

Enlist E3®

1.9-2.9 RELATIVE MATURITY

The Enlist E3® Soybean trait provides tolerance to new 2, 4-D choline in Enlist Duo® and Enlist One® herbicides, as well as, glyphosate and Liberty® herbicides.

W1970E3

RM 1.9

Late Group I with Yield, Defense and Stress Tolerance

- Excellent Adaptability and Yield Stability from Tough Acres to High Performing Acres / Great Product for Sand
- Disease Package includes PRR 1k gene, Good White Mold and Outstanding SDS Tolerance
- Medium Tall Plant with Bright Purple Flowers and a Beautiful Light Tawny - Brown Pod Look at Harvest
- Must Plant Variety for Michigan and the Early Markets of Northern Indiana
- Good Choice for Early Harvest on Irrigated Acres
- Enlist E3® Weed Control System

W2370E3

RM 2.3

Key Early Group II with Yield and Agronomics

- Widely Adapted Across Soils and Environments with Offense/Defense... A Must Plant Variety!
- Proven Disease Package with Good SDS and White Mold Tolerance Similar to W2321E3
- Great Phytophthora Field Tolerance Coupled with PRR 1c Gene and Heterozygous for the PRR 3a Gene / Awesome PRR Package!!
- Remarkable Standability and Emergence Combined with its Maturity Will Make a Lead Product on High Organic Soils and Irrigation
- Enlist E3® Weed Control System

W2885E3

NEW RM 2.8

Agronomically Sound with Unique and Unrelated Genetics

- Medium Statured Bushy Plant with Great Emergence and Standability
- Excellent Disease Tolerance including PRR Field Tolerance with the 1k Gene, SDS, Frog Eye Leaf Spot and BSR
- Good Soil Adaptation with Best Results on Medium Textured and Medium Drainage
- Unique Plant being Gray - Tan Pod and Having Bright White Flowers
- Enlist E3® Weed Control System

W2980E3

NEW RM 2.9

Outstanding Performance Acre after Acre with Lead Product Potential

- Strong Win Rate in Elite Testing / Boasting an 80% Win Rate over 2 Years / Has that Paddy-Yield Look at Harvest
- Yielded Through Heavy SDS Locations Last Year / No PRR Gene but Outstanding Field Tolerance
- Well Adapted to Soils and Yield Environments with Above Average Standability and Stress Tolerance
- Package as Your Late Season Early Variety or Your Early Season Full Season Variety / Excellent Replacement for W2960E3
- Enlist E3® Weed Control System

W2480E3

NEW RM 2.4

Early/Mid Group II with Step Change in YIELD

- Medium-Tall Plant that won't Shrink under Stress / Fantastic Stress Tolerance / Will also Stand on Irrigated Acres
- Very Good Emergence and PRR Field Tolerance with Above Average SDS Rating
- Exhibiting Excellent White Mold Tolerance Around the Lakes
- Very High Yielding Variety with Versatility on Soil Types
- Plant with W2370E3 for the Irrigated Acre or W2570E3 for the Tough Acre
- Enlist E3® Weed Control System

W2570E3

RM 2.6

Alternative Source Peking Soybean Cyst Resistance with Genetic Diversity

- Great Package Variety for the Farm from a Diversity Standpoint
- Excellent Variety for Cyst Prone Fields with Very Good SDS Tolerance and Emergence
- Medium+ Plant Height to Handle Tougher Soils with Very Good Standability
- Great Eye Appeal with an Attractive Light Tawny - Tan Pod Plant at Harvest
- Enlist E3® Weed Control System

W2785E3

NEW RM 2.7

Exciting "New" Late 2 Light Tawny with Defense and Yield

- Great White Mold Scores that Will Fit Northern Indiana and Southern Michigan Irrigated Acres
- Great Standability with Clean Looks from a Light Tawny - Brown Pod Plant at Harvest
- Great Top Pod Clustering and Overall Heavy Pod Load on Main Stem
- Limited Availability in 2024
- Enlist E3® Weed Control System

W2880E3

NEW RM 2.8

Late Group II with Yield and Stability

- W3171E3 Type of Performance as a Late Group II / Expect Top End Yields
- Medium - Tall Plant with Good Standability, Good Soil Adaptability and Stress Tolerance
- Excellent Phytophthora Field Tolerance with the Rps 1c gene / Outstanding Eastern Adaptation
- Broad Acre Variety that is a "Must Plant" on many Acres in 2024
- Enlist E3® Weed Control System

W281C **RM 2.8**

Late Group II Conventional Variety Virtually Immune to Soybean Cyst Nematode

- Outstanding Top End Yield Potential with Best Cyst Resistance Known to the Entire Soybean Industry
- Has Proven Itself Acre after Acre
- Medium Height Variety with Great Lateral Branching
- Outstanding Field Tolerance to Phytophthora with the Rps 1k Gene

W292C **RM 2.9**

Late Group II Conventional Variety with Top End Yield

- Yields with the Best Trained Varieties Out There / Next Level of Yield at 2.9
- Attractive Light Tawny Plant with Brown Pods / Medium Tall Upright Branch Plant Style with Good Standability
- Solid Overall Disease Package with Above Average SDS Tolerance and Phytophthora Field Tolerance with the 1c Gene
- Strong Emergence and Soil Adaptability / Will Yield in all Row Widths... Especially Loves the High Yield Environments

W3085E3 **NEW** **RM 3.0**

2.9/3.0 Unique Light Tawny Yields

- Medium+ Statured Plant that will Maintain Height Regardless of Soil Types
- Health Package includes Charcoal Rot Tolerance, Good Tolerance to SDS, PRR Field Tolerance plus the 1k Gene
- Will Stand after Late Summer Rains or Heavy Irrigation
- Beautiful Light Tawny - Tan Pod Plant with Purple Flowers
- Limited Availability in 2024
- Enlist E3® Weed Control System

W3380E3 **NEW** **RM 3.3**

"New" Early/Mid Group 3 Yields with Peking SCN Resistance

- 104% of Checks in Testing / Achieving High Yields in All Environments
- Great Choice for the Best Acre and those Acres not Quite Getting it Done
- Peking Cyst Resistance will Aid in the SCN Shift with Excellent Scores on Sudden Death Syndrome
- Resistant to Brown Stem Rot and Stem Canker with Solid Field Tolerance to PRR
- Excellent Lateral Branching with the Ability to Stand Late Summer
- Enlist E3® Weed Control System

W3171E3 **RM 3.1**

Setting New Benchmark in Yield for the Early III Maturity

- Excellent Performance in 2023 With Stability Over a Multitude of Sites
- Medium-Tall Plant with Good Standability and Stress Tolerance / More of a Thin Line Look but Will Still Work in Wide Rows
- Very Good Field Tolerance to PRR with the 1c Gene / Can Show Signs of SDS but Seems to Yield Through Them
- Will Be a Broad Acre Line with Solidity of Performance on In-Field Soil Changes
- Enlist E3® Weed Control System

W3580E3 **NEW** **RM 3.5**

Superior Yield Performance with "Toughness"

- Stable, High Yields in 2 Year Testing Across Seasons, Soils, Environments and Regions
- Shines in High Yield Environments
- Attractive Gray - Brown Pod Variety with a Wider Profile and Good Standability
- Defense Package includes Strong Tolerance to BSR, Stem Canker, and SDS with Excellent Field Tolerance to PRR
- Package with W3380E3 and W3760E3 for a 1-2-3 Punch!
- Enlist E3® Weed Control System

W3760E3 **RM 3.7**

Yield, Soundness and Health...A Complete Line

- Medium-Tall, Light Tawny-Brown Pod Plant with Striking Purple Flowers
- Excellent Stress Tolerance with the Ability to Move Across Soils
- Fantastic SDS Tolerance and PRR Field Tolerance with the 1k Gene
- Impressive Late Season Plant Health
- Enlist E3® Weed Control System

SOFT RED WINTER WHEAT

W 120

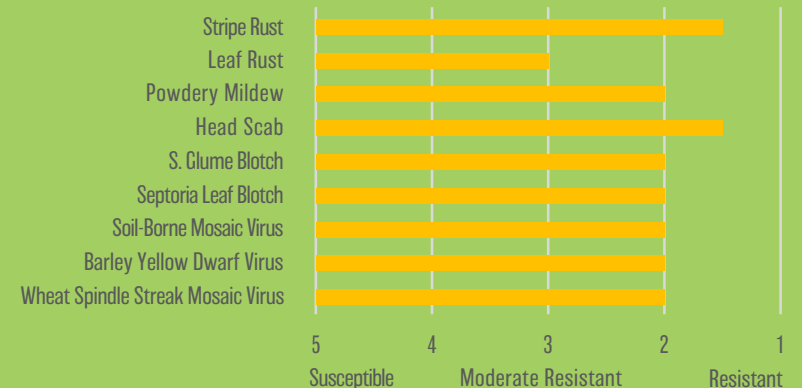

Variety Highlights

- Awnless “Go Anywhere” Variety with Yield and Health
- Superior Tolerance to Head Scab with Type I and Type II Resistance
- Good Standability and Great Test Weight
- Solid Overall Disease Tolerance
- On the 2023 Mennel’s Preferred Variety List for Michigan and Indiana
- Our Lead Wheat with the Most Supply

Agronomic Features

Head Type	Awnless
Plant Maturity	Medium
Test Weight	Very Good
Plant Height (Inches)	36
Straw Strength	Very Good

Disease Resistance

5 = Most susceptible 1 = Most resistant

W 121

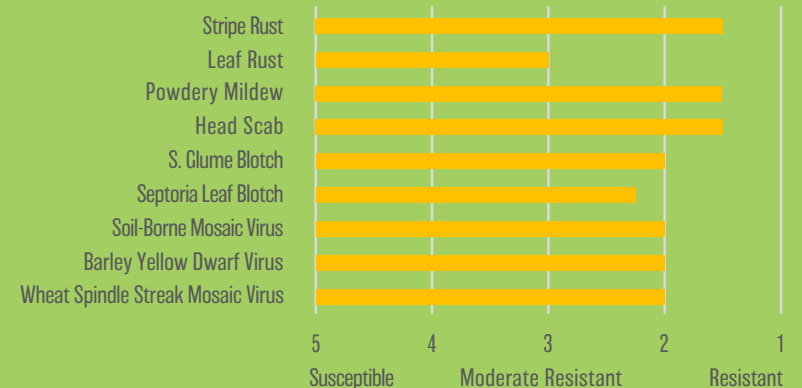

Variety Highlights

- 108% of Yield Checks Across 26 States
- One of the Highest Yielding Wheat Varieties to Ever Hit the Market
- Versatile Placement for All Soils and Management Styles
- Superior Tolerance to Head Scab with Type I and Type II Resistance
- Will Reward You with High Yield for Intense Management
- Very Good Plant Health Overall
- Supply will be Limited / Order Early

Agronomic Features

Head Type	Awned
Plant Maturity	Medium
Test Weight	Good
Plant Height (Inches)	37
Straw Strength	Very Good

ALFALFA

(All varietal products are subject to change due to availability. Alfalfa is in 50# bags.)

GA-450RR

- Best in class yield for a Roundup Ready® alfalfa with exceptional forage quality.
- Fall dormancy 4 with 30 / 30 on disease rating.
- Winter survival 1.4.*

GA-339LH

- Best in class leafhopper resistance with exceptional forage quality.
- Better yield than other PLH res. varieties. A very hardy winter rating.
- A 3.5 dormancy alfalfa with a 30 / 30 disease rating.
- Winter survival 2.0.*

GA-409 with Stand Life Genetics®

- Ultimate choice where Aphanomyces is a problem. Resistance to race 1 and 2.
- A 4 dormancy alfalfa that handles all soil types, with a 35 / 35 on disease rating.
- Winter survival 1.9.*

Econo Brand

- Econo Brand alfalfa is a blend of consistent performing alfalfas.
- It offers you economy plus performance in the field.
- Winter Survival 1.8*

GA-4409

- Deep rich green foliage with big yield and quality.
- A blend of 2 alfalfas that will give flexibility in soil placement.
- Will handle extreme wheel traffic.
- A long rotation alfalfa with outstanding persistence. A 35 / 35 disease rating.
- Winter survival 1.8.*

GA-306

- Outstanding persistence with great yields.
- Very eye appealing and handles heavy wheel traffic at harvest.
- A haymaker's favorite and is used in all Wyckoff mixes.
- Winter Survival 1.9*

Ratings are: 1*= Extremely Winter Hardy 5* = Susceptible to Winter Kill. Disease Rating** is a rating of resistance of varieties. A 30 out of 30 is Highly resistant to 6 alfalfa diseases. 5 is highly resistant per disease.

PASTURE, HAY AND TURF SEED *A Variety of Seeds to Meet All Your Needs.*

Wyckoff Hay and Pasture Mixes

50lb bags

EROSION CONTROL MIX

- 40% Fawn Tall Fescue
- 20% Hard Fescue
- 20% Tetraploid Perennial Ryegrass
- 15% Annual Ryegrass
- 5% White Dutch Clover

Wonderful choice for grass waterways, ditch banks, and highly erodible areas. It's a very tough and durable mix.

Germination: 5-7 Days

Seeding Rate: 25-30 lbs/acre

HAYLAND MIX

- 75% Wyckoff GA 306 Alfalfa
- 15% Haymate Orchardgrass
- 10% Climax Timothy

Use Hayland when you want just a touch of grass with your alfalfa.

Germination: 10-20 Days

Seeding Rate: 20-25 lbs/acre

HAYMAKER MIX

- 90% Wyckoff GA 306 Alfalfa
- 10% Climax Timothy

Plant Haymaker and cut some of the best quality hay you have ever raised.

Germination: 10-20 Days

Seeding Rate: 20-25 lbs/acre

HORSE HAY PASTURE MIX

- 55% Wyckoff GA 306 Alfalfa
- 10% Cowgirl Tall Fescue
- 10% Harvester Late Orchardgrass
- 10% Tetraploid Perennial Ryegrass
- 10% Climax Timothy
- 5% Smooth Bromegrass

Our #1 selling horse hay mix.

Germination: 5-12 Days

Seeding Rate: 25-30 lbs/acre

GRASSLAND MIX

- 25% Potomac Orchardgrass
- 25% Tetraploid Perennial Ryegrass
- 25% Climax Timothy
- 25% Fawn Tall Fescue

Used for grass hay pastures and for waterways. Has excellent roots for longevity.

Germination: 5-7 Days

Seeding Rate: 25-30 lbs/acre

PASTURE MIX

- 13% Wyckoff GA 306 Alfalfa
- 25% Climax Timothy
- 12% VNS Medium Red Clover
- 25% Potomac Orchardgrass
- 25% VNS Tetraploid Perennial Ryegrass

Our best all around pasture mix for cattle and goats.

Germination: 5-12 Days

Seeding Rate: 25-30 lbs/acre

Wyckoff Lawn and Turf Mixes

ATHLETIC TURF MIX

- 50% Kentucky Bluegrass (4 Elite Varieties)
- 50% Perennial Ryegrass (3 Elite Varieties)

The ultimate in lawn seed! For use on irrigated lawns and athletic fields. With a superb blend of exotic bluegrasses and perennial ryegrasses, it will bring that dark green color that will make you proud.

Germination: 7-14 Days

Seeding Rate: 175-225 lbs/acre

ENDURANCE MIX

- 90% Turf Type Tall Fescue (3 Elite Varieties)
- 10% Kentucky Bluegrass (1 Elite Variety)

A blend of turf type tall fescues which provide the best overall drought, insect, and disease tolerant turf. Outstanding for sandier lots and lower maintenance areas.

Germination: 10-14 Days

Seeding Rate: 225-400 lbs/acre

SUN & SHADE MIX

- 40% Kentucky Bluegrass
- 15% Chewing Fescue
- 30% Turf Type Perennial Ryegrass
- 15% Creeping Red Fescue

The ingredients of this blend make it a great fit for either the sunny or shady areas of your yard. It eliminates buying two different mixes.

Germination: 5-10 Days

Seeding Rate: 175-225 lbs/acre

ORCHARD MIX

- 50% Turf Type Perennial Ryegrass
- 25% Creeping Red Fescue
- 25% Hard Red Fescue

Orchard Mix is designed for orchard pathways and grape vineyards for its hardness and short stature with the advantage of mowing less often.

Germination: 4-7 Days

Seeding Rate: 25-30 lbs/acre

QUICK LAWN MIX

- 75% Perennial Ryegrass (3 Elite Varieties)
- 25% Kentucky Bluegrass (2 Elite Varieties)

Exceptional mix for a quick green lawn with an inexpensive price tag. Perfect for patching in damaged areas of yards.

Germination: 3-7 Days

Seeding Rate: 150-250 lbs/acre

ROADSIDE MIX

- 50% Perennial Ryegrass
- 15% Kentucky Bluegrass
- 35% Creeping Red Fescue

"The Choice" for municipal roadside and highway construction projects.

Germination: 3-7 Days

Seeding Rate: 200-225 lbs/acre

SUNNY LAWN MIX

- 50% Kentucky Bluegrass
- 20% Creeping Red Fescue (2 Elite Varieties)
- 30% Perennial Ryegrass (2 Elite Varieties)

Our #1 selling mix for contractors installing new lawns. This mix is for the homeowner who wants to add value and beauty to their home.

Germination: 4-10 Days

Seeding Rate: 175-225 lbs/acre

SHADE LAWN MIX

- 60% Creeping Red Fescue
- 20% Perennial Ryegrass
- 20% Kentucky Bluegrass

An impeccable mix for partial sun or shaded areas of the yard. Remember, if it grows moss it won't grow grass.

Germination: 4-10 Days

Seeding Rate: 200-250 lbs/acre

SMALL SEEDS / COVER CROPS / WILDLIFE FOOD PLOTS

Wyckoff Wildlife Food Plot Mixes

WILDLIFE MIX

- 19% Econo Blend Alfalfa
- 18% Medium Red Clover
- 17% Ladino Clover
- 18% Norcen Birdsfoot Trefail
- 17% White Dutch Clover
- 11% Coating Material

Germination: 7-10 Days

Seeding Rate: 12-15 lbs/acre

RUT-N-READY

- 30% Tillage Radish
- 20% Purple Top Turnips
- 20% Rapeseed
- 10% Gallath Forage Rapeseed
- 10% Vivant Brassica
- 10% Forage Collards

Germination: 7-10 Days

Seeding Rate: 8 lbs/acre

VENISON VEGGIES MIX

- 30% Sunn Hemp
- 20% Jackport Turnips
- 20% Stockade Field Pea
- 20% Purple Top Forage Turnips
- 5% Sugar Beets
- 5% Coating Material

Germination: 7-10 Days

Seeding Rate: 10 lbs/acre

DEER BLIND

- 20% Egyptian Wheat
- 20% 2021 Forage Sorghum
- 20% Sweet Bites Sorghum/Sudan
- 15% Wilder Grain Sorghum
- 15% Sunn Hemp
- 10% Peradovic Sunflowers

Germination: 7-10 Days

Seeding Rate: 44 lbs/acre

DRIVE THEM CRAZY MIX

- 45% Austrian Winter Peas
- 40% Saber Oats
- 5% Crimson Red Clover
- 5% Dwarf Essex Rape
- 5% Purple Top Turnip

Germination: 10-14 Days

Seeding Rate: 50 lbs/acre

HABITAT HIDE-AWAY

- 50% Wyckoff Hybrids Seed Corn
- 20% Peridovick Sunflowers
- 15% Iron & Clay Cowpeas
- 10% Spring Wheat
- 5% Sunn hemp

Germination: 7-10 Days

Seeding Rate: 50 lbs/acre

FULL DRAW

- 50% Winter Triticale
- 40% Austrian Winter Peas
- 5% Sailbuster Radish
- 5% Dixie Crimson Clover

Germination: 7-10 Days

Seeding Rate: 50 lbs/acre

Small Seeds, Forages and Other Mixes

We carry or can order almost any Forage or Small Seed. We also do custom mixing, so call with your needs.

Wyckoff Cover Crops

Sample of Products Available: Scavenger Radish, Winter Peas, Annual Ryegrass, Crimson Clover, Purple Top Turnips, Buckwheat, Cover Crop Wheat, Cereal Ryegrass, etc.

Lawn Care, Sweet Corn and Garden Seeds

Sample of Products Available: 12-12-12 Lawn Fertilizer, 14-0-3 w/Crabgrass Preventer, Other Fertilizers, Lawn Care products, Salt Blocks, Mole Traps, Herbicides, Insecticides, Other Chemicals, Grub Control products, Sweet Corn, Garden Seeds, Sunflowers, etc. Call our Michigan Store for more details.

- Prices are subject to change without notice and all products must be specially ordered in advance.
- Varieties used in mixes are subject to change depending on availability.

LIBERTY LINK

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

Refuge seed may not always contain the DroughtGard® trait. **IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest.** Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Acceleron®, DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, SmartStax®, Trecepta® and VT Double PRO® are registered trademarks of Bayer Group. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. LibertyLink logo® and LibertyLink® are trademarks of BASF Corporation. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. ©2023 Bayer Group. All rights reserved.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS product launch

stewardship guidance Corteva Agrisciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-Traits (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience. In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and -fop herbicides. 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

IRM - Properly managing trait technology is key to preserving it as a long-term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/trait-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html.

Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions. Enlist E3® soybeans were jointly developed by Corteva Agriscience and MS Technologies, LLC.™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of Corteva Agriscience. PowerCore® multi-event technology developed by Corteva Agriscience and Monsanto. Roundup®, Roundup Ready®, Roundup Ready 2 Technology and Design, and PowerCore® are registered trademarks of Monsanto Technology LLC. Liberty Link® and the Water Droplet Design® are registered trademarks of BASF. Enlist®, Colex-D®, and Refuge Advanced® are trademarks of Corteva Agriscience and its affiliated companies. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship.

If it is an integrated refuge product, PCE – PowerCore® Enlist® Refuge Advanced® corn products with HX1, VTP, ENL, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton-growing counties, a 20% separate corn borer refuge must be planted with PowerCore Enlist Refuge Advanced products.

Forage Genetics International, LLC ("FGI") is a member of Excellence Through Stewardship® (ETS). FGI products are

commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with FGI's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Roundup Ready® Alfalfa has pending import approvals. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate. Roundup Ready® and Roundup® are registered trademarks of Bayer Group, used under license by Forage Genetics International, LLC.

More information about Duracade® is available at <http://www.biotradestatus.com/>.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Important: Always read and follow label instructions. Some products may not be registered for sale or use in all states or counties. Please check with your local extension service to ensure registration status.

CruiserMaxx® Corn 250 is an on-seed application of Cruiser® 5FS insecticide delivered at the 0.25 mg a.i./seed rate and Maxim® Quattro fungicide. Agrisure®, Agrisure® Above, Artesian®, Duracade®, DuracadeViptera™, Viptera®, E-Z Refuge®, Cruiser®, CruiserMaxx®, Saltro®, Maxim®, Vibrance® and Vayantis® are trademarks of a Syngenta Group Company. Corn Trait Technology incorporated into these seeds is commercialized under license from Syngenta Seeds, LLC. Herculex® Technology incorporated into these seeds is commercialized under license from Corteva Agriscience LLC. HERCULEX® and the HERCULEX Shield are trademarks of Corteva Agriscience LLC. YieldGard VT Pro® is a registered trademark used under license from the Bayer Group.
